

- Course: CSC340.01
- Student: <Keith> <Rich>
- Teammate: <Aaron> <George>
- Assignment Number: 02
- Assignment Due Date & Time: 7/26/18 at 11:59PM

I needed to use both the helper functions because a starting point would have been difficult to get without passing in a current parameter.

Random remover was the challenge in this assignment. Most of the functions were gone over vaguely in class therefore it was straight forward in implementations. Clion doesn't support smart pointers so I had to download another Ide to get it up and running so that was annoying.
